

# ODI IRAF Calibration User's Guide

F. Valdes, April 2012

## Introduction

This document was written based on calibrating pODI.

The ODI pipeline is intended to provide the best calibration using greater compute resources so use of that data is likely to be more convenient.

There are many variations in the file management that can be used. This guide provides one suggestion.

The individual task pages may be missing, limited, or very detailed.
